WORK EXPERIENCE

Upstart, Remote

July 2022- January 2023

Software Engineer

Member of a Full-Stack Development team using React, Angular, Kotlin, and Ruby to work on the Small Medium Business team that manages any changes or new features for the Upstart Business Lending page.

- Worked on the Front-End with React, Angular and Back-end using Kotlin and Ruby to develop changes to the UI and APIs on a 2-week story/ ticket basis.
- Contributed changes to the UI to allow keyboard navigation to promote better accessibility of the web page using ReactJS and TypeScript.
- Worked on REST APIs with Kotlin to communicate with the Business Lending page and provide and update User's applications throughout the workflow of the web page.

J.P Morgan Chase, Plano, TX

October 2021- July 2022

Software Engineer

Front end Member of a Development team, working on a project that manages the user interface of an essential web application that allows the Bank to automate many Contact Center processes.

- Worked on the Front-End in frameworks such as Angular to develop any UI changes or new features in an Agile 2-week Sprint basis.
- Worked on the Back-End frameworks such as Java Spring Boot to create a Stock trading application that would grab the buyers quotes and return a counter-offer based on the quotes while limiting the amount of stocks that could be sold and bought.

Bank of America, Plano, TX

July 2021- October 2021

Software Developer

Member of a Full Stack Development team, working on a project that manages the user interface of an essential web application and maintains information through a separate application by connecting to multiple databases.

- Maintained and developed components for a Bank's Application that managed Trader's books with React and Material UI through released Application Updates which occurred once a month.
- Communicated and co-operated with the Business and Quality Assurance team to fix production issues with the front end and back end by pushing hot fixes to allow the users to continue their work.
- Supported with back-end development in Python and Quartz to connect the front end with the database and REST API's

EDUCATION

Year Up, Dallas, TX

August 2020 – July 2021

Year Up is a leading one-year career development program that includes college-level courses, professional training, and a six-month internship.

- Completed coursework in Web Development with specialized training in Application Development including Front End and Back End skills.
- Student Tutor which allows me to help my peers understand concepts.
